OBJECTIVE

Brisbane-based front-end web developer currently working at Corrs Chambers Westgarth. Holder of a Graduate Diploma of Information Technology at UQ, after having completed a Bachelor of Laws (Hons)/Commerce (Business Information Systems) in 2019. I have extensive skills in many fields of desktop and full-stack web development, and have further specialised knowledge in front-end development using React 18 and Next.js 13. My roots are in C++ programming and developing highly-efficient game modifications.

Looking for a position where I can learn new things; I love to tinker with all things technology and do DIY projects in my down time.

SKILLS

- Fluent in C, C#, C++, Python, HTML, CSS, Vanilla JS, jQuery, PHP, SQL, React 18, Next.js 13, NodeJS
- Great attention to detail
- Efficient work management
- Adaptable nature
- Technological competence
- Combined legal and technological background

EXPERIENCE

Junior Web Developer | Corrs Chambers Westgarth
APRIL 2021 – PRESENT

I am currently working as a Junior Web Developer at Corrs Chambers Westgarth, Australia's leading independent law firm. In this role, I have managed and developed multiple projects that aimed to improve reporting functionality and legal document generation for clients through the use of custom single-page applications and dashboards. My projects have been successfully delivered to high profile entities such as Australia Post, NAB, Vodafone / TPG, and Queensland Health to expedite legal transactions between them and Corrs, and also to provide added transparency over their work through customisable, ad-hoc reporting.

Founder | Ember Web Solutions
DECEMBER 2020 – SEPTEMBER 2022

Soon after completing my studies in Information Technology, I decided to start up my own web design business geared at small-business owners who needed a lead-optimised site to start bringing in sales. I have since created two websites for Paws Only, a family-owned pet grooming business, and the Prisoners' Legal Service, a state-funded legal centre which provides legal assistance to prisoners and their families.

Front End Developer | Sector Six Studios
DECEMBER 2020 – FEBRUARY 2021

I completed work experience with Sector Six Studios, an American Software Development business that specialises in integrating AI and machine-learning technologies into web applications. I assisted with the User Interface for their chatbot Ava, ensuring it was perfectly portable and could be installed on a client's website with no modifications required.

Business Administrator | Envisage Dental
JANUARY 2010 – DECEMBER 2019

In my role as a business administrator, I learnt vital interpersonal skills when meeting with patients, and administrative skills including completing accounting records, managing stock levels, and ensuring the practice ran smoothly. I also assumed the role of Marketing Manager during my tenure here, converting many of the practice's existing systems into digital counterparts to both strengthen patient retention and streamline many day-to-day processes in the practice.

EDUCATION

Graduate Diploma in Information Technology | The University of Queensland
2020 – 2020

Recently completed a postgraduate diploma in Information Technology with elective choices on low-level software development, web design, and graphic design.

Bachelor of Laws/Commerce (Hons) | The University of Queensland
2014 – 2019

Recently completed an undergraduate bachelor's honours degree in Law and Commerce, majoring in Business Information Systems. The courses taught have provided me with knowledge in document creation, client interaction skills, personable skills, and business analytics skills.
